

Regular preventive health screenings aim at identifying diseases at an early stage where it is still silent and most treatable.

Our health screening programs have been carefully put together to provide the most complete, holistic and premier health assessment.

Medical Partners offer 4 regular programs – **Healthy Life, Premium, Executive and Millennium.**

Feel free to contact us for any tailor made solutions.

All our health screening programs include an interview on your medical history, physical examination by the doctor and laboratory report.
